

Habib Bekir

FullStack Developer

I am a motivated full-stack developer, passionate about technology and computer science. Skilled in using Vue.js and Angular for front-end development, Nest.js for back-end, and Flutter for mobile applications. With a strong foundation in web and mobile development, I am committed to staying up to date with the latest industry trends and technologies to deliver innovative solutions. I strive to work rigorously, adhering to best practices and carefully following documentation to ensure high-quality and sustainable solutions.

Experience

2021 - ∞

Freelance

Throughout my professional career, I have sought other ways to refine my skills while earning some extra income. I have worked with both Tunisians and Belgians on enterprise applications, ranging from private dashboards to public mobile applications.

2021 - ∞

Euromedi internationale

Front-end Manager

Euromedi International is a European accreditation and certification body for healthcare. I have the privilege of working in a field where I feel I am making a difference in people's lives. I developed an application that clinics and institutes can use to verify the various compliances of their systems. To this day, I continue to work remotely with doctors on various tools to improve this accreditation.

All these tools will be part of a package that Euromedi sells to institutes.

2021 - ∞

Insight Plus

Full Stack Developer

My first full-time job was at Insight Plus, a fintech startup specializing in developing tools for currency exchange operators in Tunisia. We have over 400 operators using our main banking-grade tool to record daily transactions and more.

Recently, we launched Tunisia's first-ever marketplace for banks and currency exchange operators. We have established partnerships with some of the largest banks and hope to secure even more in the future.
